

# CA-13 Neutralizing & Sediment Filter

Simple, reliable Erie control valve provides fully automatic operation

Dome hole plug. Factory indexed for easy access when measuring bed depth and refilling calcite

Non-corrosive fiber-reinforced pressure vessel. 13" tank provides more media contact for optimal performance

Freeboard space for media expansion

Calcite media:

- Evenly adjusts PH without overcorrection or use of chemicals
- Neutralizes water to prevent metal plumbing corrosion and leaching issues
- Reduces sediment, suspended solids and turbidity

Quality garnet underbedding protects distributor

High flow distributor

Outstanding 10 Year Warranty on all parts

Specifications			
Model	CA13	Minimum backwash rate	10 GPM
Tank size	13"x54"	Maximum temperature	120 F
Media volume	2 cubic feet	Maximum pressure	120 psi
Service flow rate	12 gpm	Power requirement	120v
