

Atlantic MP36C Ultraviolet Unit

Benefits of this unit:

- Provides effective and reliable disinfection without the use of chemicals
- Unit is rated for 12 Gallons Per Minute of continuous flow
- Simple design without a circuit board or control module means that this unit is less prone to breakdowns and expensive repairs in comparison to other units
- Sight port on top of the unit allows the customer to easily determine if the UV lamp is functioning or if it is in need of cleaning
- We are the local distributor for Atlantic Ultraviolet and stock all repair and maintenance components at our Santa Rosa location and on our mobile service vans
- Low cost replacement UV lamps and Quartz sleeves result in reduced lifetime costs
- Low maintenance. Typical installation only requires annual lamp replacement
- 3 valve emergency bypass and sampling bib is included with every installation
