

# NS-13 Automatic Sediment Filter

- Simple, reliable Erie control valve provides fully automatic operation
  - Non-corrosive fiber-reinforced pressure vessel. 13" tank provides more media contact for optimal performance
  - Freeboard space for media expansion
  - Nextsand media:
    - Best available filtration performance (3-5 micron removal). Superior to multimedia filtration
    - Reduces iron, sediment, suspended solids and turbidity
    - Unique high purity mineral properties deliver reliable and efficient filtration by providing higher surface loading capacity and reduced backwash intervals
  - Quality garnet underbedding protects distributor
  - High flow distributor
- Outstanding 10 Year Warranty on tank & all parts

Specifications			
Model	NS13	Minimum backwash rate	10 GPM
Tank size	13"x54"	Maximum temperature	120 F
Media volume	2 cubic feet	Maximum pressure	120 psi
Service flow rate	12 gpm	Power requirement	120v
